NFT

Walk All Over The NFT Universe **With a Stunning NFT Marketplace!**

NFTs can reach the world through pioneering intellectual strategies and marketing capabilities.

The NFT marketplace offers startups based on NFT the opportunity to accelerate their growth in a safe, autonomous and decentralized setting. It creates an ecosystem that benefits both entrepreneurs and investors. NFT-based businesses usually raise funds through the NFT marketplace, but investors can invest risk-free.

Features you would love

Supports Popular Wallets

NFT marketplaces that suppose most coins like Bitcoin, Litecoin, Dogecoin and Ripple, as well as ERC-20 tokens on EVM-compatible blockchains.

Secure Smart Contracts

A smart contract is a program stored on the blockchain that can automatically execute when certain conditions are met. They are typically used to store or facilitate transactions between digital assets.

Ease of Integrations

With NFT Marketplaces that we design for you, all systems work together and in harmony ensuring productivity and data consistency, as well as resolving the complexity associated with increased communication between systems.

Multiple Blockchain Support

In a multichain blockchain, a project is deployed across multiple networks so that they can communicate with one another.

Buy/Sale and Auction of NFT

Creating platforms for you that make transactions as secure as possible. Buy, sell and auction off your NTFs.

Fully loaded Admin Features

Admin features like managing access requests, creating and editing groups, managing web services (webhooks and APIs), billing, storing additional licences and setting up global preferences for currencies and time format.

Highly Customizable

It is possible to customize your NFT Marketplace to suit the needs of individual people or tasks.

Multiple Digital Assets Supported

Photo files, video files, audio files and graphic files will be accessible on the platform for smooth running.

Platform Characteristics

Build For

Curated Arts

Artists can create and sell their digital art as one-of-a-kind items and collectors can own and trade these artworks as valuable assets. Galleries can also use NFTs to sell and authenticate digital art, allowing a new way for the art world to expand and evolve.

Luxury Goods

Through NFTs, luxury brands can deliver a unique brand experience, reward brand loyalty, and engage with customers more interactively and personally while providing greater transparency into the provenance of their products.

Fashion

NFTs in fashion can take many forms, including virtual garments that customers can wear within virtual environments, digital content with which owners can interact, and even digital twins of physical items.

Music Industry

More often than not, Music-Based Virtual Properties grant collectors ownership of a percentage of a song — or royalties accrued from that song via streaming, record sales, and so on.

Metaverse

With NFTs, you'll be able to own interoperable digital goods in a virtual world, including avatars, avatar clothing, avatar animations, virtual decorations, and weapons.

Game

Since the NFT is held on a blockchain, its data and ownership are tracked and are above corruption, which makes it easy to transfer from one game to another.

Client Testimonials

Don't just take our word for it, read from our extensive list of case studies and customer testimonials.

FanAnywhere

"I'm very happy with the level of service I received. I liked working with the team and we had great responsive communication throughout the project. They accommodated all my request. We are starting a new project in a few days. I highly recommend MINDDEFT as a strategic partner for all you IT/Technology requirements."

ApeOnly

"Krunal and the team did a great job with this project. They are knowledgeable about NFT marketplace development and I would recommend working with them. Thank you for your efforts guys! Hope to work with you again soon."

Carny

"Krunal and his team helped us a lot with our NFT Marketplace Platform. They are exceptional professionals who provide great value. For blockchain based development, which is a very specialized category, they are magnificent. 100% recommended."

Platform Characteristics

Ethereum

Ethereum is a decentralized blockchain platform that establishes a peer-to-peer network that securely executes and verifies smart contracts.

Polygon

Polygon is a blockchain platform that aims to provide scalable, secure, and instant transactions with Ethereum currencies such as ETH, USDC, MATIC and DAI.

Binance Smart Chain

The Binance smart chain is one of the world's fastest blockchains. It is well known for its lightning-fast transactions. The blocks in a BSC are made every 3 seconds, making it one of the fastest blockchains in the world.

Solana

Solana is a blockchain platform designed to host decentralized, scalable applications. It can process many more transactions per second than rival blockchains like Ethereum and charges lower transaction fees.

About **us**

Founded back in 2015, Minddeft came about by a bunch of like-minded individuals, who always place 'customers' at the forefront, realizing there was a gap in the market for fairly priced Blockchain services. Thanks to our vastly experienced team, technically astute managers and overall group dynamics, we have forged multiple effective solutions using Blockchain technology. Even though the tenure has been short, we've managed to build strong ties with US and UK based companies to expand their horizons and know-how. This is what puts us in good stead when it comes to serving your business in this dynamic market landscape.
